

# Edible Fruit Pack

## Blackberry - 'Darrow'

Moderate growth rate, up to 5 feet. Prefers moist to well-drained, sandy loam soils with partial to full sun. Not tolerant to dry, hot conditions. Primarily used as a food resource by humans and wildlife (blackberries have record diameter of 1 inch). This hybrid bears its large fruit over a long season from late spring through early summer. Fruits are borne on second

## Blueberry - 'Blue Crop'

The most widely planted mid-season producing blueberry cultivar in the world. It can produce high yields of medium sized blueberries. It is a disease resistant and cold hardy blueberry plant produced by selective breeding. The plant can grow to a height of 6-8'. Blue crop blueberries are enjoyed by humans and animals.

## Blueberry - 'Jersey'

Is a late season producing blueberry plant. It produces high yields of small blueberries. The plant is cold hardy and can grow in a wide range of soils when compared to other blueberry cultivar. Jersey blueberries are also enjoyed by humans and animals.

## Raspberry - 'Latham'

This plant requires full sun to grow well. It typically flowers in the late spring and produces bright and tasty berries mid summer that are enjoyed by birds as well as humans. It grows to approximately 3-5' in height and has dark green leaves.

## Strawberries - 'Jewel'

A common variety of strawberry that is widely grown and sold. The berries are large and wedge shaped that are firm and are abrasion resistant. This variety of strawberry is well known for its flavor and high quality berries. This plant also has longer yielding seasons than other strawberry plants. The flowers of the strawberry plant can attract pollinators and the plant and it's fruit are eaten by many animals.
